Novartis CCAP Project : Siemens Support

Dear Mr Wang Ou & Mr Yu Ninghua,

I am writing to you on behalf of Novartis CCAP project to thank Siemens Industrial Automation Shanghai for very successfully completing the CCAP project. This very important China Acceleration Project is now entering chemical trails for the Pilot Plant & in the PQ phase for the GMP Kilo Lab. This success would not have been possible without the dedication, professional attitude, technical expertise and customer orientated attitude of your team.

I would like to thank **Mr Dong Bangbing**, Siemens CCAP PM, for effectively driving his team to deliver on time and within schedule. His customer focus was 100% throughout the lifecycle of the CCAP project and he ensured his team made every milestone. His thorough knowledge of GMP standards was greatly appreciated by Novartis Validation Engineers.

I would like to thank **Mr Wang Yingfeng & Mr Yan Chunming**, Siemens CCAP software engineers, for their dedication, hard work and technical expertise on PCS7 and S300. They displayed very professional attitudes to delivering high quality structured software code and diligently prepared high quality documentation to compliment it. They willingly worked overtime and weekends at short notice to ensure that the project kept track and Novartis are very grateful for this. There GMP experience was invaluable for the CCAP project.

I would like to thank **Mr Chen Cheng**, Siemens freelance software engineer, who has been part of the CCAP team from Nov '09. He has integrated into the team seamlessly and has quickly adapted to PCS7 & S300. He is very keen to learn and is a good team player.

All of your team are very amiable characters and it would be a pleasure to work with them on any future projects.

Sincerely Yours,

Jonathan Kay
Lead E&I Engineer
CCAP Project

Erol Guel
